	Jeff,		
	See attached drawings for locations where we need you to remove/reinstall the carpet tiles.		
	The areas with purple text are directed towards your scope for SI-14.1.		
Request Details:	The electricians will locate the new floor boxes and you would remove the carpet tile, set it aside for reuse, and the electrician will install their devices. The costs from you would be to remove/reinstall the carpet tiles as required including any additional glue required. INM offered to remove the carpet tiles, but I'm concerned about voiding your workmanship warranty. What are your thoughts? Depending on whether your crew is onsite, this might save a trip.		
	CME will handle floor protection during the saw cutting/INM will handle the protection during their coring of the second floor.		
	I would like to submit pricing Wednesday if possible. Please call to discuss.
